Plant Health Care plc

Plant Health Care and Symbiot Business Group Enter into Exclusive Agreement

Plant Health Care plc ("PHC" or the "Company"), the leading supplier of natural products for plants and soil, announces it has entered into a strategic, exclusive partnership with US-based Symbiot Business Group (SBG).

Under the agreement, PHC becomes a Premier Business Partner to Symbiot's network of top-tier, independent landscape contractors from across the U.S. PHC will be the exclusive supplier of natural and biologically-based products to the entire Partner network consisting of over 500 landscape contractors.

John Brady, CEO of PHC commented, "We are very excited to be able to offer the Symbiot Landscape Network advanced training and marketing support to help them effectively promote Plant Health Care products to their customers. Participating in Symbiot's Business Partners programme gives PHC the opportunity to work closely with one of the most respected landscape companies in the business.

"We believe that this is another strong indication that PHC's business strategy is working well and offers further validation of our technology and products. The benefits of this arrangement will become apparent in 2006 and thereafter as we begin to derive revenues from Symbiot's business partners."

PHC and Symbiot Business Group will work closely to develop joint marketing programmes and promote PHC product sales through other Symbiot Business Partners.

Notes to Editors:

About Plant Health Care - Plant Health Care plc ("PHC") is a leading provider of natural products for plants and soil. Established in 1995 in Pittsburgh (Pennsylvania) in the United States, PHC currently has approximately 60 employees and has operations in the US, Mexico, UK, Spain, and the Netherlands with technical support in Austria. The

Group has two principal operating subsidiaries in the US - PHC Inc (PA) and PHC-REC. The Company listed on the AIM market of the London Stock Exchange in July 2004.

PHC's products are aimed at the horticulture, agriculture, turf grass, commercial landscaping, forestry and land reclamation industries and are both environmentally beneficial and on the whole more cost effective than synthetic chemical alternatives. Through the commercialisation of these products, PHC is capitalising on current long-term trends toward natural systems and biological products for plant care and soil and water management uses.

PHC-REC is an environmental and reclamation engineering consulting firm which provides engineering and design services for reclamation lands disturbed by mining, construction, and other activities. PHC-REC is the recognised leader in the use of biologically based solutions using mycorrhizal fungi and bacteria for the establishment of trees, shrubs, and grasses on these disturbed lands. PHC-REC was established in 1997 to exploit PHC's products and technology.

About Symbiot Business Group - Symbiot Business Group benefits national and multi-regional asset managers by reducing their *total cost of contracted property services*. Symbiot accomplishes this by delivering the efficiencies of multiple property services with national reach and pricing. The delivery method of these efficiencies is unique in the marketplace, as Symbiot recruits top-tier regional players to provide consistent, superior services. To date, Symbiot has successfully developed consortiums in the landscaping, interior, snow and pest industries that currently represent nearly 1,000 partner companies and a combined annual buying strength of more than \$1.5 billion. The phenomenal uptake of the Symbiot model is due to the credibility of the Symbiot management team in its target verticals and the value Symbiot delivers to partners.
