Plant Health Care Plc
(‘PHC’ or ‘Plant Health Care’)

First Distribution Agreement in China

Plant Health Care is pleased to announce its entry into the rapidly expanding Chinese market, with a distributor agreement with Beijing Plant Health Care Inc.

Beijing PHC will purchase goods manufactured by PHC for distribution and sale to distributors and end users for use in landscaping, arboriculture, nursery, floriculture and sports turf within China's 'green industry'. Initially the products will be available within 11 Chinese provinces, covering the area between Beijing and Shanghai. The venture will begin as a 5 year renewable agreement.

Activity in China has reinforced the viability of this partnership with Beijing PHC. China has announced a 'Total Commitment' to improve its Environmental and Beautification Programme announcing recently to spend US\$61 billion on all major cities and projects in China.

Plant Health Care USA believes this China Business is the launch pad for increased business for PHC given China's commitment to the environment and the beautification of its country.
