

Plant Health Care plc
("PHC" or "the Company")

Interim Results for the six months ended 30 June 2006

Plant Health Care plc, a leading provider of natural products for plants and soil, announces its interim results for the six months ended 30 June 2006.

Plant Health Care was established in 1995 in Pittsburgh (Pennsylvania) in the United States. Its products are aimed at the landscape, agriculture and land reclamation industries. The Directors believe the products are both environmentally beneficial and on the whole, more cost effective than synthetic chemical alternatives. Through the commercialisation of these products, Plant Health Care is capitalising on current long-term trends toward natural systems and biological products for plant care and soil and water management.

Highlights

- Encouraging results from extended Myconate trials
 - now expect significant commercial sales in 2007
 - ahead of commercialisation milestones
- Significant progress in agriculture
 - Pre-Tect trials in US
 - OPF registration in US
