("Plant Health Care" or "the Company")**

Natural Products Supply Agreement

Plant Health Care (AIM: PHC.L), a leading provider of natural products to the agriculture and landscape industries, announces that it has entered into a multi-year supply agreement with The Scotts Company ("Scotts"), the global leader in the consumer lawn and garden industry. Under the terms of the agreement, Plant Health Care will supply Scotts with natural products for inclusion in their line of lawn and garden products for the retail market.

In addition to this agreement the two companies will continue working together to explore future applications of Plant Health Care's technologies in products for the retail lawn and garden and professional horticulture markets.

John Brady, CEO of Plant Health Care commented, "It is pleasing to have reached an agreement with Scotts that makes our natural products more available to retail customers. The Board believes that, as awareness and demand for effective natural products continue to grow, this partnership will be strategically important.

Our stated goal is to become a global leader in the development and supply of natural products for plant health and it is through relationships with businesses such as Scotts that we will achieve this."
