

PHC[®] for Palms 8-2-10

PHC for Palms 8-2-10 is a multi-nutrient formulation designed specifically to address the common nutritional deficiencies that occur in landscape palms and tropical plants. This product combines a calculated mineral composition with fertility-enhancing bacteria, to address both immediate and long-term nutritional needs of palms.

DIRECTIONS FOR USE

Apply 1.5 pounds of granular product per 100 square feet of area extending twice the diameter covered by the canopy. Alternately, use 1.5 pounds per 10 inches DBH. Broadcast product, and if possible, rake it in, then mulch the area. Irrigate within 24 hours. Do not treat this area near the palm with fertilizer containing higher nitrogen (N) levels. Applications should be repeated every three months or 4 times per year.

Note: Inoculation with mycorrhizal fungi applied by injection or vertical mulching is recommended once per year for best results.

STORAGE/SHELF LIFE

This product is stable in cool, dry storage conditions. See expiration date on package.
